

85 YEARS HEESEMANN

Dear business partner,

When Karl Heesemann began in 1933 to improve and market the technology of the sliding table belt sander, which was still in its infancy, this took place under the most unfavorable economic and political conditions. Nevertheless, the solutions developed under the youthful Elan quickly found first customers.

Whether Karl Heesemann dreamed at the time that the name Heesemann would be a synonym worldwide for the highest quality sanding machines and perfect sanding results? Maybe. Did he, especially in the difficult early years, always believe in it? Probably not. What is certain is that Karl Heesemann has tirelessly developed new technologies and innovations, many of which are still in existence today.

In 2018, 85 years after the founding of the Karl Heesemann Maschinenfabrik, sanding machines from Bad Oeynhausen are located in production sites in many countries on all continents. From Panama to China, from Indonesia to the USA. Of course in Germany and almost all European countries. If you value high-quality sanding results, you cannot ignore Heesemann.

We would like to duly celebrate our 85th anniversary with our employees, customers, dealers, suppliers and partners. For this we cordially invite you to our anniversary celebration in our factory in Reuterstraße 15, Bad Oeynhausen on Thursday, 11th October 2018 from 5:00 pm.

If you would like to learn more about the latest Heesemann sanding machines and our new **profiRounder** deburring machines, then visit our sanding days on October 11 and 12 at 9:00 am with demonstrations and presentations on sanding technology applications.

We look forward to seeing you and ask for your message by 20 September 2018.

Best regards
